

We bring old machines back to life!!!

Right now, most manufacturers have to postpone investments in new machines indefinitely. However, the quality of production depends on the well-functioning machine park.

With us you have the opportunity to recondition your machines that have grown old and thus improve the quality of work.

We offer you different options:

1. An extensive warehouse for spare parts for the Benzinger, Posalux and other popular models in our branch.
2. Repairs of the machines in both mechanical and electrical areas.
3. Or have your machines completely overhauled and brought up to the state of the art both mechanically and electronically.

Contact us, we can modernize your machines, which are indispensable in your production, and make them fit for the next few years.

We are specialists in wedding ring machines.
